(FM) ORGANIZATION

Source: Adapted from ISO 41001: 2018

- ISO 41001: 2018 is the management system standards (MSS) for FM.
- All MSS's help organizations improve their performance by specifying repeatable steps that organizations consciously implement to achieve their goals and objectives.
- All MSS's follow a uniform 10 step structure and utilize the PDCA cycle: **PLAN > DO > CHECK > ACT**
A continuous cycle of self-evaluation, correction and improvement of operations and processes.
- Audits are a vital part of the MSS implementation, and may lead to certification.

Benefits of ISO 41001 adoption

- Demonstration of documented, evaluated and standardized processes.
- Improved induction and training for employees and contractors.
- Reduced waste and improved efficiency.
- Define control processes in order to boost the FM organization's performance and productivity.
- Enhanced problem detection and opportunities for continuous improvement.
- Provide an improved demand organization experience.
- Increase confidence and enhanced reputation.

Plus FM's alignment with the SDGs = Sustainable FM
